

111TH CONGRESS
2D SESSION

S. _____

To promote the deployment of plug-in electric drive vehicles, and for other purposes.

IN THE SENATE OF THE UNITED STATES

Mr. DORGAN (for himself, Mr. ALEXANDER, and Mr. MERKLEY) introduced the following bill; which was read twice and referred to the Committee on _____

A BILL

To promote the deployment of plug-in electric drive vehicles, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Electric Vehicle De-
5 ployment Act of 2010”.

6 **SEC. 2. FINDINGS.**

7 Congress finds that—

8 (1) the United States is the largest consumer of
9 petroleum in the world, consuming 19,500,000 bar-
10 rels per day of petroleum products during 2008;

1 (2) high and volatile international oil prices rep-
2 resent a significant and ongoing threat to the eco-
3 nomic and national security of the United States;

4 (3) many of the nations on which the United
5 States relies for petroleum supplies or that signifi-
6 cantly affect the world petroleum market share nei-
7 ther the national interest nor the values of the
8 United States;

9 (4) the United States imports more than 50
10 percent of the petroleum needs of the country each
11 day;

12 (5) in 2008, the net deficit of the United States
13 in petroleum trade amounted to more than
14 \$380,000,000,000, or nearly 60 percent of the total
15 trade deficit;

16 (6) the transportation sector of the United
17 States accounts for over $\frac{2}{3}$ of total national petro-
18 leum consumption and is 94 percent reliant on pe-
19 troleum;

20 (7) the electrification of the light-duty vehicle
21 fleet represents a direct pathway to significant re-
22 duction in petroleum dependence, because passenger
23 cars and light trucks account for more than 60 per-
24 cent of the transportation petroleum demand and

1 more than 40 percent of total petroleum demand in
2 the United States;

3 (8) the electrification of the light-duty vehicle
4 fleet promotes national energy security because the
5 electric power sector uses a diverse range of domes-
6 tic electricity generation sources;

7 (9) electric drive cars, when running on electric
8 power, produce no tailpipe emissions;

9 (10) the deployment of 700,000 plug-in electric
10 drive vehicles would result in a petroleum savings of
11 approximately 10,000,000 barrels per year compared
12 to the annual petroleum consumption as of the date
13 of enactment of this Act;

14 (11) in 2030, the United States could feasibly
15 deploy more than 100,000,000 plug-in electric drive
16 vehicles, which would result in a petroleum savings
17 of more than 1,000,000,000 barrels of petroleum per
18 year and greenhouse gas reductions of over
19 300,000,000 tons of carbon dioxide compared to the
20 annual petroleum consumption and greenhouse gas
21 emissions as of the date of enactment of this Act;
22 and

23 (12) a targeted deployment program for plug-in
24 electric drive vehicles that is focused on competi-
25 tively selected deployment communities—

1 (A) represents the best opportunity to in-
2 troduce plug-in electric drive vehicles to the
3 market; and

4 (B) with the information learned from the
5 deployment communities, will—

6 (i) inform best practices for the wide-
7 scale deployment of plug-in electric drive
8 vehicles; and

9 (ii) substantially reduce the oil con-
10 sumption of the United States.
